# Who We Are

Drill Corp Saudi (DCS) is a leading drilling contractor with over a decade of specialized operations across Saudi Arabia and West Africa. We deliver comprehensive drilling solutions for exploration and production, serving major mining and mineral development clients with a commitment to safety, quality, and innovation. Our diverse team of 16 nationalities brings deep technical expertise and cultural awareness to every project.

## Global Reach

Operations in KSA, Mauritania, Guinea, Senegal, and Algeria

## Technical Expertise

Diamond Core, RC, Air Core, Blast Hole, Underground & Grade Control

## Cultural Diversity

16 nationalities with strong African & Middle Eastern presence

## Industry Partnerships

BHP Billiton, Glencore, Ma'aden, Xstrata, Kinross

# Our Services

---

## EXPLORATION DRILLING

---

Diamond Core Drilling  
Reverse Circulation (RC)  
Air Core (AC) Drilling  
Multi-purpose Rigs

### Ancillary Services:

- Down-hole Surveys
- Core Orientation
- Directional Drilling
- Site Rehabilitation

## PRODUCTION & GRADE CONTROL

---

Blast Hole Drilling  
Grade Control Drilling  
Delineation Drilling  
Underground Diamond Drilling

### Support Services:

- Blast Design Consulting
- Geological Logging
- Safety Management
- Quality Assurance

# Equipment Fleet

## Drilling Rigs – Total Fleet: 39 Units

Diamond Core (DD)	21 rigs
Reverse Circulation (RC)	7 rigs
Blast Hole	3 rigs
Air Core (AC)	7 rigs
Underground Diamond	1 rig

## Auxiliary Equipment – Total: 87 Units

Air Compressors (mobile)	10 units
Boosters	5 units
Support Trucks	20 units
Light Vehicles (4x4 & sedans)	52 units

### Fleet Capability: 126 Total Assets

Our diverse fleet enables simultaneous operations across multiple project sites, with full technical support and maintenance c

# Operational Track Record

## 3,323,635 Meters Drilled

as of December 2024

### Saudi Arabia Operations

Diamond Core Drilling	128 km
Reverse Circulation	207.3 km
Grade Control Drilling	115.2 km

### Record Achievements

Deepest Hole in Saudi Arabia	1,027 meters
Deepest Hole Overseas	1,400 meters
Largest RC Project	Guinea – Mont Nimba
Longest Grade Control Program	Tasiast Gold Mine, Mauritania

# Project Portfolio – Saudi Arabia

## Ma'aden Phosphate Program (Wadd Al Dawasir)

Diamond Core: 45 km

Reverse Circulation: 82 km

Grade Control: 38 km

## Ma'aden Gold Projects (Jabal Sayid & Sukhaybarat)

Diamond Core: 83 km

Reverse Circulation: 125.3 km

Grade Control: 77.2 km

## Ma'aden Rare Earths Program

Diamond Core: Preliminary surveys

Reverse Circulation: Delineation support

Grade Control: Ongoing

## Saudi Arabia Operations Summary:

10+ years of continuous partnership with Ma'aden, delivering exploration and production drilling across multiple commodity types

# Project Portfolio – Africa

## Tasiast Gold Mine, Mauritania

Kinross Gold

Reverse Circulation: 1,200,000 meters

Grade Control Drilling: Comprehensive

Diamond Core: 67,000 meters

Blast Hole: 100,000 meters

## Guinea – Mont Nimba Iron Ore

Operational since 2015

Reverse Circulation: 40,000 meters

Diamond Core: 30,000 meters

## Senegal – Sabodala Gold Mine

Production support

Reverse Circulation: 35,000 meters

## Algeria – Mineral Exploration

Multiple clients

Reverse Circulation: 35,000 meters

# Client Portfolio

## **BHP Billiton**

Global mining leader; DCS provides specialized exploration and production drilling support across multiple operations.

## **Glencore**

Diversified commodity producer; long-standing partnership for RC and core drilling in West Africa and Middle East.

## **Ma'aden**

Saudi Arabia's national mining company; 10+ years of continuous drilling operations including phosphate and gold programs.

## **Xstrata (now Glencore)**

Iron ore and mineral exploration; DCS executed major exploration programs and grade control drilling.

## **Kinross Gold**

Gold mining operator; DCS manages ongoing production drilling and grade control at Tasiast Gold Mine, Mauritania.

# HSE Commitment

## Zero Harm. Zero Compromise.

Safety is not a compliance issue—it is fundamental to our operations.

### Our HSE Pillars:

1

#### Visible Leadership

Management actively engaged in safety at all levels, leading by example and demonstrating commitment to zero harm.

2

#### Continuous Improvement

Regular safety audits, incident investigations, and employee feedback drive ongoing program enhancement.

3

#### Empowered Employees

All staff trained, authorized, and encouraged to stop unsafe work and report hazards without repercussion.

### Standards & Compliance:

- ISO 45001 Health & Safety Management
- ICMM Mining Principles alignment
- Local regulatory compliance (KSA, Mauritania, Guinea, Senegal, Algeria)
- Regular third-party safety audits

# Why Partner With Us

---

## Experienced Workforce

---

Diverse team of professionals with deep technical expertise across all drilling methods and diverse geographic and geological terrains.

## Established Supply Chain

---

Proven logistics and supply chain capabilities to support operations in remote Saudi, West African, and North African locations.

## Full-Service Capability

---

Comprehensive solutions from exploration through production, including ancillary services, reducing project complexity and timeline.

## Safety Excellence

---

Industry-leading safety culture with zero-harm commitment, supporting your operational excellence and compliance objectives.

## Local Content Commitment

---

Strong African and Middle Eastern presence with deep cultural awareness and local employment practices in all operating regions.

## Proven Track Record

---

10+ years of successful operations with major multinational clients, demonstrated through consistent delivery and long-term partnerships.
